Organization Overview

Organization Name:	Hanna Education Corporation
Organization Address:	17000 Arnold Dr Sonoma, CA 95476-3242
Website:	https://hannaacademy.org/

Contact Information

Primary Contact Name:	Monica Argenti		
Primary Contact Title:	Manager, Grants and Compliance		
Primary Contact Email:	margenti@hannacenter.org	**Primary Contact Phone:**	707.933.2562 Ext.
Director/CEO Name:	Cameron Safarloo		
Director/CEO Title:	President and CEO		
Director/CEO Email:	sroomian@hannacenter.org	**Director/CEO Phone:**	707.933.2560 Ext.

Proposal Summary

Requested Amount:	$20,000
Project/Program Title:	Career Technical Education Expansion for High-Needs Youth
Project/Program Summary (one to two sentence summary of your request):	Expanding digital media and design CTE tracks to equip trauma-impacted youth with industry-relevant skills, technology, and pathways toward self-sufficiency and workplace success.
Project/Program Start Date:	08/01/2025
Project/Program End Date:	07/31/2026
Total Annual Organization Budget:	$7,071,482.00
Total Project/Program Budget:	$35,524.00
Program Area:	Workplace Success
Grant Geographic Service Area:	County(ies) - In California
Grant Geographic Service Area County:	Sonoma
Please Specify Other:	
Grant Age Group	

Served (Should match program area): High School 15-18

Have you received a Kimball Foundation grant in the last five years?

Yes No

Narrative Questions

Concise description of your organization including history, mission, number served, and type(s) of programs and/or services provided . (Limit 500 words) Please Note: Bulleted lists may skew your word count.

Hanna Academy is a non-public high school and independent 501(c)(3) nonprofit serving high-needs youth ages 14–18 who have experienced trauma, adversity, or systems involvement and who require individualized support through an IEP (Individualized Education Plan). The Academy offers a specialized education model for students with emotional and behavioral challenges that may have excluded them from traditional schools.

Originally part of Hanna Boys Center, Hanna Academy became its own nonprofit in 2023 to focus more directly on high-quality academic and workforce preparation for students with unique barriers to success. The Academy, located in Sonoma Valley on a shared campus with its partner, Hanna Center, is fully accredited by the Western Association of Schools and Colleges (WASC), as well as certified by the California Department of Education. In 2024, Hanna Academy opened a residential program to provide supportive housing for up to 24 students.

The school serves approximately 60 students per year, the majority of whom come from Sonoma County (64%) and Marin County (12%), with the remainder from across Northern and Central California. Hanna Academy welcomes students with IEPs regardless of ethnicity, race, religion, gender, status, or income-level.

In addition to meeting state standards for high school graduation, Hanna Academy integrates Career Technical Education (CTE) as a core part of its model. The Academy also prioritizes social-emotional learning, trauma-responsive practices, and project-based learning to help students recover a sense of agency, success, and purpose in school and life. Beyond academics, Hanna Academy equips youth with critical life competencies such as financial literacy, conflict resolution, vocational training, time management, and job readiness. These concepts are systematically embedded into students' routines, aligned with individualized transition goals. Each student has a customized educational and behavioral support plan, co-developed by a multidisciplinary team (teachers, therapists, family members, and the student). Students actively shape their own learning goals, classroom needs, and therapeutic plans—an approach grounded in self-determination and healing-centered engagement.

At Hanna Academy, academics are fully integrated with therapeutic support, creating an environment where students receive individualized education alongside daily mental health services. Because the school operates as a partner to Hanna Center's broader continuum of care, students also have access to on-site therapy, vocational training, substance use prevention, and safe transitional housing—all on one campus. This holistic model allows young people to heal, learn, and grow in one coordinated system that supports every aspect of their development and transition to successful adulthood.

Concise description of the project/program if applicable, including purpose, goals, objectives, number served, and timeline. (Limit 500 words) Please Note: Bulleted lists may skew your word count.

This grant would support the expansion of Hanna Academy's Career Technical Education (CTE) program through the launch of new multi-year pathways in digital photography, graphic design, and 3D modeling. These tracks will be embedded into the school-day curriculum and are designed to prepare students for creative and technology-driven fields with high growth potential.

The purpose of the program is to help students facing major obstacles to employment including trauma histories, behavioral health needs, and disrupted education to develop technical, creative, and soft skills that will increase their ability to pursue living-wage jobs or post-secondary training. While existing CTE offerings include Construction Trades, Health, Technology for Industry, and Culinary/Hospitality, the digital tracks will strengthen the program's alignment with expectations of workers in STEAM fields and workplace success goals.

Program goals for the 2025–26 school year include:
• All first-year students will take an exploratory digital design and media course (10-weeks)
• Identify 10-15 students interested in progressing to along digital design track
• Providing all interested students with access to industry-relevant equipment and software
• Increasing student self-reported job readiness and confidence in career interests
• Creating direct links to internships and workforce experiences in collaboration with the onsite Hanna Career Center

Timeline:
• Fall 2025: Equipment acquisition, curriculum refinement, and onboarding
• Winter 2026: Enroll students in exploratory course
• Spring 2026: Begin introductory level courses for interested students; track outcomes and skill acquisition
• Summer 2026: Continued implementation, identify and invite new students to pathway-specific work, begin development of subsequent courses

Hanna Academy is requesting $20,000 to support the technology backbone of this expansion. Funds would be used to purchase 10 high-performance computers, with remaining funds applied toward licensing software, acquiring used DSLR cameras and accessories, and building a durable equipment inventory to serve students over multiple years.

Program evaluation will include student feedback, skills assessments, and internship tracking. Based on survey data from other CTE modules, students consistently report increased confidence, improved school engagement, and greater clarity in their career goals. Hanna Academy endeavors to help more students reach these goal with diversified career training opportunities on campus through the new digital design track.
